PROFILE

Versatile software development professional successful in producing robust systems to meet diverse customer needs. Manages projects and teams to accomplish a challenging timeline. Explores technical capabilities and pushes boundaries to exceed expectations. Maintain organised, clean and safe work areas with diligent attention to important details.

EXPERIENCE

BIMBI PHILIPS LIMITED, London, United Kingdom — Senior Software Developer/Team Lead

January 2021 - April 2023

- Managed software throughout SDLC and collaborated with team members to address issues.
- Effectively coded software changes and alterations based on specific design specifications.
- I lead the team of other developers to convert the entire backend infrastructure from vanilla Expressjs(Javascript) to Expressjs (Typescript).
- Developed and presented findings and solutions to audiences including senior executives and stakeholders.
- Designed, coded, tested, and deployed new UI features and systems using CI/CD best practices.

ZKTeco West Africa, Lagos, Nigeria — Senior Software Engineer

JULY 2020 - December 2020

- Achieved functional requirements by creating cutting-edge software solutions.
- Worked autonomously to effectively handle small- and large-scale projects.
- Built innovative, highly scalable products using latest technologies and approaches.

LANGUAGES

- Managed software throughout SDLC and collaborated with team members to address issues.
- Drafted software requirements and managed software design and implementation.
- Developed, coordinated, and conducted complex tests and debugged systems.

English.

Yoruba.

SB Telecoms, Lagos, Nigeria — *Software Engineer*

FEBRUARY 2019 - JUNE 2020

- I worked with other teams of engineers in architecture design development, and scalable software applications.
- Executed functional and integration testing and software delivery support.
- Managed software throughout SDLC and collaborated with team members to address issues.
- Developed intuitive, easy-to-navigate, and aesthetically pleasing user interfaces.
- Selected appropriate libraries and open source technologies for project integration.
- Tuned software features to meet specific customer demands and hardware limitations.

MY PHILOSOPHY

I have not failed. I've just found 10, 000 ways that won't work.

Edison

Xplug Technologies, Lagos, Nigeria — *Software Developer*

JANUARY 2017 - JANUARY 2019

I led a team of other developers on product design, front-end engineering and architecture, created mockups and contributed to design and development of highly scalable software solutions for enterprise clients.

EDUCATION

Federal University of Technology Akure, Nigeria.

Electrical/Electronics Engineering – BEng.

SEPTEMBER 2009 - DECEMBER 2014
